M Hashim Ali, Dibrugarh : Bihu flows eternally in the hearts of Assamese people. Proving this yet again, Assamese individuals living across the seas celebrated Rongali Bihu abroad. Residents of Newcastle, England celebrated Rongali Bihu recently. The event, held at the Drama Hall of John Spence Community High School, was inaugurated with the lighting of lamps by Mrinalini Devi, former Vice-President of Asam Sahitya Sabha. Following a recitation of 'Ghokha', the event was formally opened. Primarily aimed at

building bridges between communities, a special feature of this Bihu celebration was the exclusive screening of the Assamese film 'Goodbye Guruji', produced by Arunjeet Bora. Notably, guests from France also attended the event to enjoy the film. Among them was Mary, the mother-in-law of Parthapratim Hazarika, who plays the lead role in the movie. She traveled all the way from France to watch the film. Special guests for the event included Tim Meron and Deva Meron from England. After the mesmerizing film screening, sev-

eral captivating performances followed. Bengali woman Karabi Choudhury danced to the tunes of Zubeen's Bihu songs. Several children also took part in the event. Fourteen-year-old Niyara played the flute while Arush played the piano, performing the tune of "O Mor Aponar Dekh." The main coordinator of the entire cultural program was Dr. Bhaskar Dutta. Advantage Assam 2.0: Charting a Path to Address Unemployment

■ **Yahia Ahmed**
Marigaon

Assam, a state rich in culture, natural resources, and strategic geographic positioning, has long stood on the brink of transformative economic change. Amid persistent challenges such as unemployment, the introduction of initiatives like Advantage Assam 2.0 brings renewed hope while raising critical questions about the future of work and prosperity in the region. This essay examines whether Advantage Assam 2.0 can provide a viable solution to Assam's unemployment problem by exploring its potential, identifying challenges, and considering its broader socio-economic implications.

■ **The Context of Unemployment in Assam**

Unemployment in Assam is not a new phenomenon. The state—predominantly known for its tea gardens, oil resources, and agriculture—has experienced significant structural shifts in its economy over recent decades. Although traditional sectors remain vital, they have not always generated enough jobs to support a rapidly growing and increasingly educated population. Additionally, factors such as geographical isolation, limited industrial diversification, and skill mismatches have compounded the unemployment issue. In this context, a comprehensive and forward-thinking policy framework is both urgent and essential.

■ **Understanding Advantage Assam 2.0**

Advantage Assam 2.0 represents a strategic initiative designed to catalyze economic growth through enhanced infrastructure, investment incentives, and human capital development. Building on previous efforts, it focuses on modernizing key sectors, promoting entrepreneurship, and leveraging Assam's unique assets to attract both domestic and international investors. Central to this initiative is the belief that a holistic approach—combining policy reforms, technological integration, and targeted skill development—can transform the state's employment landscape.

■ **Potential Pathways to Reducing Unemployment**

1. Infrastructure Development

and Industrial Growth

A major component of Advantage Assam 2.0 is the emphasis on upgrading infrastructure, including roads, rail connectivity, and digital networks. Enhanced infrastructure reduces the cost of doing business and makes the state more attractive to industries seeking well-connected regions for operations. By fostering industrial clusters and establishing special economic zones, the initiative can stimulate job creation in sectors ranging from manufacturing to information technology. Improved connectivity may also bridge the urban-rural divide, ensuring that economic benefits extend to peripheral areas.

2. Skill Development and Education Reforms.

A critical element of the initiative is its focus on human capital. Establishing targeted training programs and skill development centers can help address the prevalent mismatch between the skills of the local workforce and the demands of emerging industries. Collaborations with educational institutions and industry experts will ensure that training programs are tailored to employers' needs, thereby enhancing employability. By equipping youth with skills in digital technology, modern manufacturing, and service sectors, Advantage Assam 2.0 could transform the unemployment challenge into an opportunity for building a dynamic workforce.

3. Entrepreneurship and Small Business Support.

Encouraging entrepreneurship is essential for creating sustainable employment opportunities. Advantage Assam 2.0 is expected to offer incentives for start-ups and small businesses through financial support, mentorship programs, and streamlined regulatory processes. This approach can spark innovation and open new job avenues, especially in sectors such as agro-processing, tourism, and handicrafts, where Assam already holds significant potential. Small and medium enterprises (SMEs) can serve as engines of economic growth, providing resilience against global economic shocks and promoting localized development.

4. Leveraging Natural and Cultural Assets

Assam's rich natural heritage and cultural diversity are unique ad-

vantages that can be harnessed under this initiative. Tourism—particularly eco-tourism and cultural tourism—holds significant promise for generating employment. By investing in sustainable tourism infrastructure and promoting Assam as a premier travel destination, the state can create jobs not only in the hospitality sector but also in ancillary services such as transport, retail, and entertainment. Moreover, developing niche markets like organic agriculture and indigenous handicrafts could boost employment in rural areas and help reduce urban migration.

■ **Challenges and Considerations**

While the vision of Advantage Assam 2.0 is ambitious, several challenges could impede its success:

- **Implementation and Governance:** Effective execution of policies is paramount. Bureaucratic inefficiencies, corruption, or political instability could derail even the best-intentioned plans. Robust transparency and accountability mechanisms are necessary to ensure that projects are completed and deliver the promised benefits.
- **Skill Mismatch and Labor Market Rigidities:** Despite improved training programs, there is a risk that the local workforce may not immediately meet the technical demands of modern industries. A phased and adaptive approach—where continuous feedback from industry informs educational reforms and training curricula—is required.
- **Balancing Traditional and Modern Economies:** Assam's economic fabric is woven from both traditional sectors, such as agriculture, and emerging industries. Policymakers must strike a balance to ensure that modernization does not disrupt the livelihoods of those dependent on traditional sectors. Bridging this gap is essential for maintaining social stability and ensuring inclusive growth.
- **External Economic Factors:** Global market fluctuations, trade policies, and external investment climates can also impact the success of local initiatives. Building resilience

through diversification and adaptive economic policies will be critical.

■ **A Blueprint for the Future**

If implemented effectively, Advantage Assam 2.0 has the potential to significantly reduce unemployment by creating a more vibrant, diversified, and inclusive economy. Its multi-pronged approach—from infrastructure upgrades and industrial promotion to education reforms and entrepreneurial support—offers a comprehensive strategy that addresses both the symptoms and root causes of unemployment. However, the initiative's success depends on the commitment of both the government and private stakeholders to collaborate and ensure that policies remain responsive to the evolving economic landscape.

While Advantage Assam 2.0 is not a silver bullet that will instantly eradicate unemployment, it represents a promising blueprint for long-term economic revitalization. By addressing structural challenges, investing in human capital, and leveraging its unique assets, Assam can gradually transform its unemployment woes into a narrative of growth and resilience. The journey ahead will require sustained effort, adaptability, and a shared vision of progress—a vision that could ultimately pave the way for a more prosperous and equitable Assam.

I Will Not Write for You

■ **Sidharth P K**
Kochi

I will not write for you,
As the stars' fall
Into the bliss
And moon be the same.

I will not pray for you,
Even the skies mourn
And the tears rage
Among the heart silences.

I will not sing for you,
The music is over
And birds stop to recite
Your verse and life.
I will not cry for you,
As you are left into
The no-where of destiny,
Silent and motionless.
